1. Fill in the ENV with your details:

```
DISCORD_BOT_TOKEN=YOUR_BOT_TOKEN
DISCORD_CLIENT_ID=YOUR_BOT_CLIENT_ID
DISCORD_CLIENT_SECRET=YOUR_BOT_CLIENT_SECRET
GUILD_ID=YOUR_SERVER_ID

# Channel IDs
REQUIRED_ROLE_ID=YOUR_STAFF_ID
STAFF_ROLE_ID=YOUR_STAFF_ID_AGAIN
GIVEAWAY_CHANNEL_ID=YOUR_CHANNEL_ID_FOR_GIVEAWAYS
INVITE_LOG_CHANNEL_ID=YOUR_CHANNEL_ID_INVITE_LOGS
SUMMARY_CHANNEL_ID=YOUR_CHANNEL_ID_FOR_SUMMARYS
QUOTA_WARNING_CHANNEL_ID=YOUR_CHANNEL_ID_FOR_QUOTAS
# Web Dashboard
PORT=COME_BACK_TO_THIS_LATER
SESSION_SECRET=RANDOM_LETTERS_AND_NUMBERS
DISCORD_REDIRECT_URI=COME_BACK_TO_THIS_LATER

# MongoDB
MONGODB_URI=mongodb+srv://braxrbx:kb0IWVuRK0Xj8Yez@cluster0.idcll
jc.mongodb.net/mutual_giveaway_db?retryWrites=true&w=majority&app
Name=Cluster0
```

2. Setup Bot.
   1. Go to https://discord.com/developers/applications
   2. Create a bot
   3. Go to Bot Tab and copy token and paste it into the .env
   4. Go to Oauth2 copy your client ID and Secret and paste them in.
   5. Add a new redirect and then set it to
   http://localhost:3000/auth/discord/callback
      However change localhost:3000 to whatever your server IP is and whatever your server port is.
   6. Make a copy of this link and paste it into your .env under discord_redirect_URI
   7. Under Oauth2 go to URL generator and check; identify, guilds, email, connections, bot, application.commands.
   8. Then select the redirect URI you created just undere the URL generator.
   9. Set the bot permissions to Administrator
   10. Copy the Generated URL it gives you at the bottom of the page.
3. Web Dashboard - Set your port to whatever port you are using
4. Database (MongoDB Atlass Signup Link)
   1. https://www.youtube.com/watch?v=SMXbGrKe5gM - Follow this video step by step. Make sure your Connection URL is Node.JS and it is in the MongoDB_URI= variable in the .env. Finally make sure your have allowed access to all IP's otherwise your database wont work.
